Dear Sir / Madam,

I desire that, after my death, my body be donated for the purpose of study and / or research work at Veerangna Avantibai Lodhi Autonomous State Medical College, Etah (U.P.), an undergraduate teaching institution. Kindly register my name for the same.

I expect that the person / persons lawfully in-charge of my body after my death shall respect my wish and follow the guidelines for the same.

Yours sincerely,

\_\_\_\_\_  
(Donor's signature and full name)

### Department of Anatomy

#### BODY DONATION – GUIDELINES FOR DONATING THE BODY AFTER DEATH

1. The relatives should inform the department of anatomy as early as possible after death of donor and bring the dead body to the department within six hours after death.
2. They have to arrange for the transport of the body on their own. The transport facility (Hearse) can be availed from private trusts like \_\_\_\_\_ mobile no \_\_\_\_\_.
3. After death, body will be accepted in the Department of Anatomy on any day of the week between 10 am and 4 pm. The relatives should inform the department on \_\_\_\_\_ before bringing the body to the department, so that necessary arrangements for accepting the body can be made.
4. While bringing the dead body, **photocopy of the “cause of death” certificate** issued by the attending doctor and **photocopy of Aadhaar card** should be brought along.
5. **An Affidavit has to be signed by close relatives** i.e. husband / wife, father/mother, son, daughter, daughter-in-law, son-in-law, brothers, sisters and / or family doctor.
6. If the donor has registered his / her name for eye/skin donation, then the eyes/skin should be donated at the registered place within the stipulated time and then the body should be brought here.
7. Bodies of patients with HIV/AIDS, Hepatitis B, Hepatitis C, (Or any other Infectious Diseases), gangrene and sepsis, bodies after Post- Mortem examination and police cases **cannot be accepted**. Registered donors should note that their bodies may be rejected under the above circumstances.
8. A donated body is preserved properly and is used for dissection by medical students in this institution, as display specimen/s in the museum and/or research purposes.
9. A body is given due respect during handling. Our students as well as staff members are given instructions about the same. They are made aware of the importance of the **“Body Donation Programme”** and the valuable contribution of the donor. Finally, body get its last right according to their religions. Therefore it is **not possible** to provide “asthi” (ashes) to relatives.

We pray for your healthy & long life. We assure you we will respect your wish & do full
